

*Shredding Technology from **CORENZO***

European-engineered industrial shredders designed for reliability, performance, and long-term value in demanding recycling and waste processing applications.

WHY IS CORENZO?

- 1. Custom-engineered shredders for every application*
- 2. More than 2000 shredders installed worldwide*
- 3. Heavy-duty construction using highest quality steel*
- 4. Complete turnkey recycling lines*
- 5. Fast global service & spare parts support*

Shredding technology from **CORENZO** in Italy- tailored perfectly to your needs.

CorEnzo has developed various cutters for each shredder according to the specific properties of each material. The width of the blades, the tooth shape, the number of teeth per blade and their arrangement on the circumference determine the performance characteristics of each cutter.

CorEnzo; not only sets high quality standards for the right cutter. Also important are the stable seat on the shaft and easy, service-friendly replacement. As an international manufacturer of shredding machines and complete systems for industrial applications, Corenzo is your ideal partner for a wide range of shredding operations. Why so? Corenzo has been developing customised shredders with over 2000 shredders in use worldwide.

CorEnzo
EcoService

HEAVY DUTY SHREDDER MACHINE

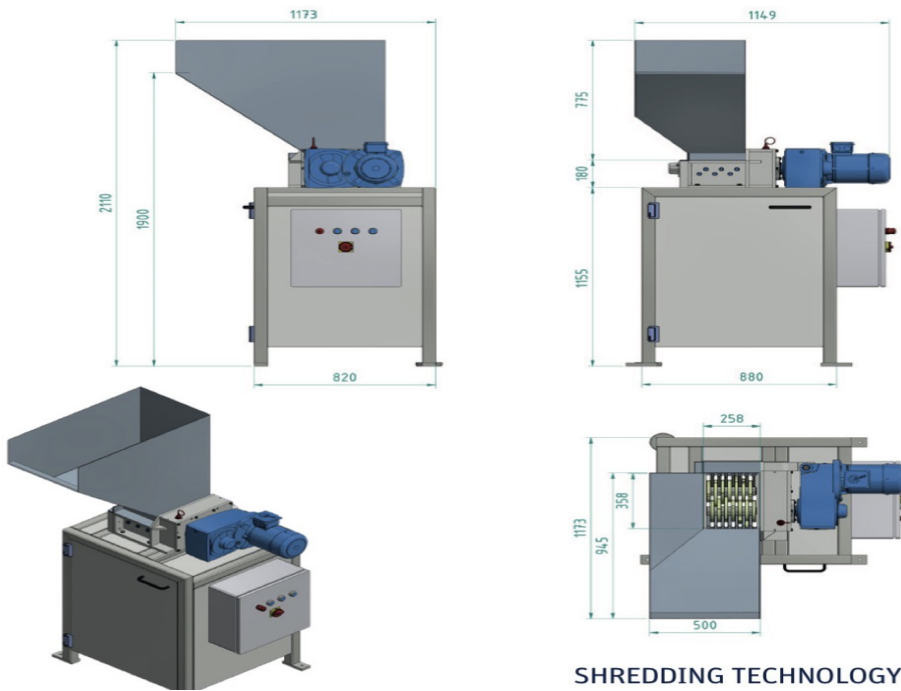

Single-Shaft Shredders

CorEnzo single-shaft shredders are engineered for controlled size reduction with high torque and optimized cutting geometry. They are ideal for plastics, RDF, wood, paper, and industrial waste streams where consistent output quality is required.

Double-Shaft Shredders

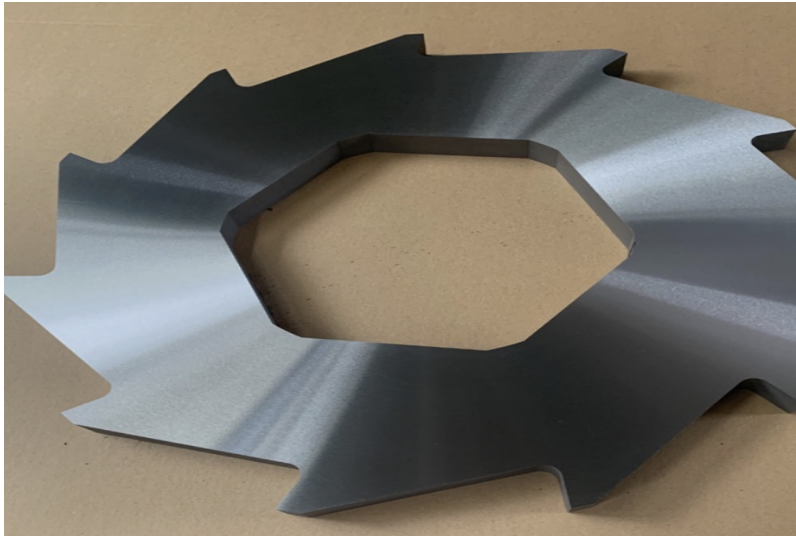

Italy

SHREDDING TECHNOLOGY FROM

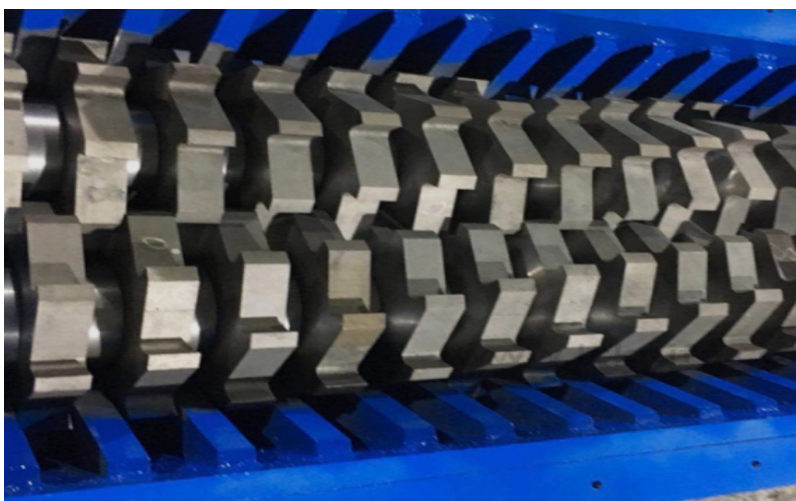

Designed for extreme-duty applications, CorEnzo double-shaft shredders deliver exceptional torque and aggressive cutting action. They are used worldwide for metals, bulky waste, tires, MSW, and heavy industrial scrap.

AdvancedCutter & Blade Technology

CorEnzo has developed various cutters for each shredder according to the specific properties of every material. The width of the blades, tooth geometry, number of teeth per cutter, and their arrangement around the circumference directly determine the performance characteristics of each shredding system. Beyond high-quality steel and heat treatment, CorEnzo ensures a stable blade seat on the shaft and easy, service-friendly replacement — minimizing downtime and maximizing productivity.

FAST SERVICE

As an international manufacturer of shredding machines and complete industrial systems, CorEnzo is your reliable partner for a wide range of shredding operations. With more than 2000 shredders in operation worldwide, we specialize in developing fully customized solutions tailored to customer-specific requirements.

Our service-oriented design philosophy ensures fast maintenance access, quick spare part availability, and reduced lifecycle costs — a decisive advantage for European and global markets.
